

Alarm System

deter | detect | monitor | respond™

PM10

Long Distance Wireless P.I.R. Motion Detector

- * Built-in Microprocessor
- * Auto temperature compensation
- * Low power LED indicator
- * Anti-RFI/EMI interference
- * Detection distance: 8m
- * Detection angle: 110°
- * Power supply: 9V battery X 1
- * Transmitting distance: >1000m (open area)

PM25P

Wireless Pet Immune P.I.R. Motion Detector

- * Built-in microprocessor
- * Auto temperature compensation, reducing false alarm
- * Low power LED indicator
- * Anti-RFI/EMI interference
- * Detection area: 8m
- * Detection angle: 110°
- * Power supply: 1.5V battery x 2
- * Battery life time: about 18 months (depend on triggering frequency)
- * Pet immune, less than 35 KG
- * Direction analysis technology
- * Transmitting distance: >150m (open area)

PM52C

Wireless Triple Technology P.I.R. Motion Detector

- * Built-in microprocessor, auto temperature compensation, reducing false alarm
- * Direction analysis technology
- * Low power LED indicator
- * Anti-RFI/EMI interference
- * Pet immune, less than 35 KG
- * Detection distance: 8 Bm
- * Detection angle: 110° (beam angle 15°)
- * Power supply: 1.5V battery X 2
- * Battery life time: about 18 months (depend on triggering frequency)
- * Transmitting distance: >80m (open area)

PM91

Wireless P.I.R. Motion Detector

- * Doppler effect + power analysis
- * X-Band plane antenna
- * Microwave detecting distance adjustable
- * Auto temperature compensation, reducing false alarm
- * Dynamic threshold adjustment technology with high interference immunity
- * Look-down window design, avoiding dead angle
- * Intelligence technology identifying intruder from interference signal
- * Detection coverage: 12m/110°
- * Transmitting distance: >3000m (open area)
